CHEM 1161: General Chemistry for Science Majors

Not an official Northeastern University syllabus. Course code, title and credits come from the institution's public catalog; everything else below is invented.

Credits	5 semester credits	**Term**	Fall 2024
Contact hours	75 hours (lecture + lab)	**Instructor**	Synthetic Instructor 5
Prerequisites	None	**Office hours**	(not applicable - test file)

Course description

General Chemistry for Science Majors. Topics include gas laws, ocean environments, laboratory safety, thyroid and stoichiometry; later weeks address periodic trends, adaptive immunity and chemical bonding.

Learning outcomes

By the end of the course, students will be able to:
1. Explain the core ideas of gas laws.
2. Apply ocean environments to solve standard problems.
3. Analyze problems involving laboratory safety.
4. Use thyroid in practical exercises.
5. Evaluate approaches to stoichiometry.
6. Communicate findings about periodic trends.

Weekly schedule

Week	Topic	Activity / assessment
1	Gas laws	Problem set
2	Gas laws (continued)	Lab or workshop
3	Ocean environments	Quiz
4	Laboratory safety	Case study
5	Laboratory safety (continued)	Problem set
6	Thyroid	Reading and discussion
7	Review and midterm	Midterm exam
8	Stoichiometry	Lab or workshop
9	Stoichiometry (continued)	Quiz
10	Periodic trends	Case study
11	Adaptive immunity	Problem set
12	Adaptive immunity (continued)	Reading and discussion
13	Chemical bonding	Problem set
14	Review and synthesis	Final exam / project

Assessment

Component	Weight
Problem sets / assignments	25%
Labs	15%
Midterm exam	25%
Final exam or project	30%
Participation	5%

Materials and policies

SYNTHETIC SAMPLE - NOT AN OFFICIAL RECORD

Required materials: instructor-provided open course notes and readings posted on the course site. Grading scale: A 93-100, A- 90-92, B+ 87-89, B 83-86, B- 80-82, C+ 77-79, C 73-76, C- 70-72, D 60-69, F below 60. Policies: see the institution's own catalog; none are reproduced here.
