PSYCH-UA 10: Statistics for the Behavioral Sciences

Not an official New York University syllabus. Course code, title and credits come from the institution's public catalog; everything else below is invented.

Credits	4 semester credits	**Term**	Spring 2025
Contact hours	60 hours (lecture + recitation)	**Instructor**	Synthetic Instructor 1
Prerequisites	None	**Office hours**	(not applicable - test file)

Course description

Statistics for the Behavioral Sciences. Topics include hypothesis testing, word recognition, research ethics, APA-style reporting and scientific method; later weeks address correlation and regression, descriptive statistics and circadian rhythms.

Learning outcomes

By the end of the course, students will be able to:
1. Explain the core ideas of hypothesis testing.
2. Apply word recognition to solve standard problems.
3. Analyze problems involving research ethics.
4. Use APA-style reporting in practical exercises.
5. Evaluate approaches to scientific method.
6. Communicate findings about correlation and regression.

Weekly schedule

Week	Topic	Activity / assessment
1	Hypothesis testing	Problem set
2	Hypothesis testing (continued)	In-class exercise
3	Word recognition	Quiz
4	Research ethics	Case study
5	Research ethics (continued)	Problem set
6	APA-style reporting	Reading and discussion
7	Review and midterm	Midterm exam
8	Scientific method	In-class exercise
9	Scientific method (continued)	Quiz
10	Correlation and regression	Case study
11	Descriptive statistics	Problem set
12	Descriptive statistics (continued)	Reading and discussion
13	Circadian rhythms	Problem set
14	Review and synthesis	Final exam / project

Assessment

Component	Weight
Problem sets / assignments	25%
Quizzes	15%
Midterm exam	25%
Final exam or project	30%
Participation	5%
